DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Figures 1 and 2, and at least claims 7 & 28, drawn to a method of making a Chemical FET, classified in class 438, subclass 49.
 - II. Figure 3, and at least claims 7, 17, & 28, drawn to a method of making a Single Electron Transistor, classified in class 438, subclass 800.
 - III. Figure 4, drawn to a method of making a Linear Drive Motor, classified in class 438, subclass 34.
 - IV. Claim 29, drawn to a method of making a microelectrical mechanical device, classified in class 438, subclass 50.
 - V. Claim 30, drawn to a method of making a microfluidic device, classified in class 438, subclass 23.
 - VI. Claims 1, 14, 24-27, are drawn to a generic method of making a bioelectronic component, classified in class 438, subclass 1.

2. The inventions are distinct, each from the other because of the following reasons:

Invention VI is generic to species Inventions I-V. Each of the species inventions have mutually exclusive characteristics from each of the other species inventions, because species I is drawn to a chemical FET, species II to a quantum electron device, species III to a drive motor, species IV to a microelectronic mechanical device, and species V to a microfluidic device. Because the generic invention is common to all

species and each species has mutually exclusive characteristics and are patentably distinct from each other, the restriction is proper, see MPEP 806.04 (d), (e), and (f).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the generic invention and one of the species inventions to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
